

Autism post v4:

Redemption Arc Edition

Below you'll find a bunch of artists using the same prompt to maybe help come up with ideas

Now with a more neutral prompt, alphabetical order, higher resolution and other fixes

There are about 150 more artists than the last one, mostly thanks to 4 combo anon, but I've removed the combo/pedo and loli gens at the bottom because those didn't seem too useful. For those that are new, note that these are relatively neutrally prompted images, you can force most (but not all) of these artists to drastically different results if you prompt things like "kemono", "realistic", "female", "young", etc. have fun with it.

the top is anything i loosely considered "realistic" or "manly" from the last gens and below that is anything that was really different or cartoony. The results have changed a bit from the prompt changes but it was terribly sorted before too so don't rely on the section titles too much.

I've added the artists provided by the anon who did the 4 artist combo resource which you should definitely also check out. I believe it's more useful than this, but this one has its niches (to me at least)

4 combo anon's artists has more realistic artists, so if you're looking for that kinda stuff don't stop scrolling right when things get too anime.

Changes:

Removed the heavy weighting of "fur" to let the artist prompts neutral state come out more

Switched to EasyFluffV11 to be consistent with 4 combo anon

Improved negative prompt brings out more color

Seed doesn't change halfway through because I got a new gpu, which is a plus.
