

# Captured 1 Remastered

The entire Captured Series has been off the market for a little over a year now because I have been planning to re-release many of the titles in this incredible series. If you remember, the original Captured Series had one very strong and intense trigger word SINKER! For years after its release other hypnotists would use that word on their own subjects because it was so well known and powerful. Without effort the subject was rendered totally helpless and compliant. This time I have not only produced a good quality recording, I have rewritten the script quite a bit and added SUBLIMINAL BINAURAL BEATS. I am coming after you with both barrels loaded this time... you will find yourself Captured in so many ways. How many ways can I kidnap you and make you vanish into the thin air? That's what the Captured Series is all about, being captured from different places and taken again and again to be programmed in My secluded basement lab. BLACK RUBBER SUIT Those of My slaves that own the original must refresh your training now by exposing your mind to Captured Remastered. you must obey Dominica. you crave all of My training and the thing you have waited so long for is finally here.... Come closer pet... closer... EXERPT: Stepping now through another door with an examination table at the end of the room, crawl onto the table face down as I pour the thick, liquid LATEX all over your body, turning you over and pouring the latex from your head to your feet as the liquid latex hardens all over your body, tiny sensors in the latex now stuck all over your body expose your weaknesses to Me. Mmmmm weaknesses I intend to take full advantage of. BLACK RUBBER SUIT, 1000 tongues licking and kissing and sucking in every single crease, crack and crevice of your body, controlling your body while My words control your mind. You now CRAVE My control as you float and drift on My melodic entrancing voice and all of My suggestions become fact within your mind as I become your Nemesis.

Length 42 min
