

Project P.I.S.S.

Project P.I.S.S. is yet another undertaking from the creator of Vintage Sleep. Shiri the Hypno Witch and I MzDominica combining Our talents and skills have Masterminded a program to solve your problem with being able to let go and let your bladder flow without your own commands to do so. So many people approach Us about wanting to release HELPLESSLY and this fantastic MP3 combining background sound effects of actual peeing (MzD's), Delta/Theta Brainwave synchronization, Confusion Techniques, and light NLP is a MUST have for those of you seeking true release. You are first put into a light trance which is then deepened, deepened again, then yet another induction is used inside the original trance to fight any resistance you may have. Once down the hands of your internal clock tick back tic toc to an innocent age where your SUPPOSE to listen to and follow adults advice 😊 Once the commands are deeply embedded in your mind you are accosted with the sound of actual peeing and the need and desire to release is just too much for you to resist as your mind floats away in the relaxed state We have induced. Then even more suggestions and deepening is performed to ensure your body and minds total compliance. The sample MP3 includes part of the actual MP3 with the sound of My peeing and the Brainwave Synchronization so that you can be teased and CRAVE the type of total control this One of a kind recording is all about!

Length 40 min
