

Simulation Slave 1

I've decided to expand My hypnotic empire with a computer game. You've heard about those games that simulate a city... or a family... or even a whole planet. Well My game simulates a slave. That's right, I call it Sim Slave. I can make a slave so sexy and perverted! Boy slave... girl slave... whatever... I put in the settings, and then I start you up... and see how you react to My legs in shiny leather boots... the swing of My glittering, hypnotic crystal... Will I program you to cum at the sight of My black, satin gloves? Or make you tremble in ecstasy at the mere sound of My Voice? Maybe when I text you a trigger word, you will fall down on your knees, begging to lick My pussy? Or make you just want to tease Me with your wiggling ass... Yeah, you want to see whether I'll slip a pair of pink, frilly panties on you... or rest My feet on your butt, like a foot stool, while I call up all My girlfriends and invite them over for a game of ring toss at your hard cock! You can just guess what the winner gets to do with you! I can program a Sim Slave to be any kind of boy... or girl... I WANT. Even an animal, or a piece of furniture... bound and horny, begging quietly with your eyes because your gag won't let you utter one, single sound! Mmmmm... I LOVE games!

But first... first I need to ERASE what is already there... tear down your personality... WIPE your memories... turn you into a clean slate, ready for Miss Daizy to write NEW instructions upon you... and define just what kind of horny, slutty slave you are!

Are you ready to be wiped clean... clear... EMPTY?

Are you ready to become Miss Daizy's newest blank Sim Slave template?
