Title: /mlp/ makes MLP

ITT: We are working on producing show quality animation. The current project is "Derpy's Day on" (working title), a short about Derpy's misadventures managing the weather. View the story board here: <https://youtu.be/0oV0W0Cw1HE>. Any Anon can contribute, check the thread for resources and information on getting started. Before beginning work, check to be sure that no one else has claimed that task.

>How to animate in Flash

To get a basic understanding of the tools in Adobe Flash/Animate, please take a look at the first entry of the Double Rainboom tutorials (<https://youtu.be/RQIfsG4ged4>). Completing the included animation exercises helps a lot with understanding. This next video (<https://youtu.be/ITL6LPvddbU>) also covers some basics but also helps to show how the character rigs work. These two videos should be a great starting point. If you need help with anything feel free to ask in the thread.

>Active tasks

Animate Derpy's Day On in Flash
Create vector art for backgrounds
Suggest ideas for next project
Collect resources for animation
