Friendship

Version 2.2—

The Moon Sets

# Chapter 1: Rules

# Stat System

**Courage is Magic** makes full use of the standard 4.0 DnD system's combat system. Everything that can be done in that game can comfortably translate to a campaign of CiM. Though there are significant differences.

A **New Stat System** has been introduced into Courage is Magic that replaces the Dungeons and Dragons one for the sake of streamlining gameplay and allowing new players easier access to the rules.

## Instead of Six stats there are now Four.

- **Strength** now also includes Constitution, and is associated with physical melee damage, lifting heavy loads and powering through foes' attacks.
- Dexterity is now **Agility**. This stat determines how agile a player is, the amount of damage they deal with ranged weapons and how hard they are to hit.
- Intelligence is now **Knowledge**, and is associated with the player's ability to decipher riddles, puzzle out problems and understand the infinite mysteries of magic.
- Wisdom and Charisma are now **Friendship**. This stat determines how gregarious the player is, their ability to communicate well with others and understand their natural surroundings.

Add half your **Strength** to your **Stamina Regeneration**.

**Strength** is used to break objects, as well as for pushing, pulling, and lifting.

**Strength** is used for **Endurance**, **Athletics** and **Intimidate** checks.

Add half your **Agility** to your **Armor Class**.

Add your **Agility** to your **Imitative**.

**Agility** is used for **Acrobatics**, **Stealth** and **Thievery** checks.

**Knowledge** is used for **Arcana**, **History**, **Religion**, **Perception**, **Religion**, and **Dungeoneering** Checks.

**Knowledge** is used for **Diplomacy**, **Heal**, **Nature**, **Bluff**, **Friendship**, **Streetwise**, and **Insight** Checks.

### Stats have been simplified greatly.

- **Instead** of using the 1-18 system that DnD uses, Courage is Magic uses a 1-10 system **for stats**.
- **Stat modifiers** have been removed, instead replaced by the actual stats themselves.

**Example:** In DnD, when you hit someone with a sword, you would add your stat modifier damage. So a 12 strength would be +1 modifier: thus +1 damage.

In CiM, if you hit someone with a sword, you simply add the strength score itself to the damage. So 1 Strength is +1 damage. 4 Strength is +4 damage, and so on.

### The leveling bonus has changed too.

- **Instead** of dividing your level by half and rounding down for your level bonus to **AC**, **Damage**, and **Attacks** it is now **Equal** to your level
- **For Example**, if you are level 3, you gain +3 to **AC**, your **Damage** rolls, your **Attack** rolls.

### Skill Checks

For **skill** and **attribute checks** you do not add any bonus from your level, only by training, talent, or attributes and other bonuses can you raise those modifiers.

### Defense Consolidation

There is only one defense, **Armor Class (AC)**. **Will**, **Reflex** and **Fortitude** are no longer in the game.

# Leveling System

A **New Leveling System** has been created for Courage is Magic that replaces the 1-30 range that DnD uses.

Players now have a leveling range of **1-10**.

- **Levels 1-3** are talented but inexperienced. They have not come into the full spectrum of their abilities yet and feel somewhat incomplete. Players and the GM are discovering the World and the Characters are discovering themselves.
- **Level 4-6** characters have come into the fullness of their talents tempered by experience. Players will find their characters are significantly freer to alter the world proactively and can take on major threats to Equestria. At the height of this tier, characters will be able to embrace a **Destiny** a powerful secondary class that expands or expands upon their capabilities.
- **Level 7+** characters are truly epic heroes with world altering capabilities. They have exceeded mortal limitations and are free to determine their own fates and can stand against epic threats on their own hooves.

Upon leveling up players Gain.

- A **Level** bonus to **Attack, AC, Initiative** and **Damage**.
- An Increase to their maximum **Stamina & Life Points**.
- **Additional** Attribute Points, Skill Trainings, and Merits depending on level.

**Destinies are secondary classes for players**

At level 6, a player may choose a **Destiny** that adds a secondary class to their primary one. As you level, you get abilities from **Both** classes; the Destiny represents you becoming an important character that will transcend time.

# Health System

**Courage is Magic** utilizes a more dynamic health system that balances risk with reward, letting players feel not only powerful but also where they have to consider the ramifications of their actions.

Hit Points and Healing Surges have been removed;  
A player's Health is divided into two portions:

**Stamina** and **Life**

## How Stamina Works

- **Stamina** is an incredibly important resource for a player. It represents the integrity of their armor in deflecting blows and energy for leaping out of the way of danger.
- This pool of health **Does** come back during combat naturally on its own. It is added up until the maximum amount is reached at the beginning of a player's turn.
- Stamina works as a **Shield** that takes damage first. When a player is hit for damage, all of it is drained from stamina first.

A character's maximum **Stamina** is based on their Class, Level and worn Armor.

Characters **Regain** stamina at the start of their turn equal to their **(Strength/2) + (Level\*2)**.

Characters regain full stamina when they use a **Second Wind** or take a short rest.

## A New Condition: Shaken

A **Shaken** creature can't use **Opportunity Attacks** or **Immediate Actions**, and loses its **Minor Actions** during its turn.

## How Life Works

- **Life** is the most important stat for a player. It represents the amount of stress and damage the body can take before giving out.
- This pool of health **Does Not** come back during combat naturally on its own. Players must use an extended rest to heal.
- Once a player runs out of health, they are not only knocked out of the fight until resuscitated by an ally. They may suffer a permanent **Disability** if they have negative Life Points equal to their Level and Primary Stat.

A character's maximum **Life Points** are based on their Class, Level, Primary attribute and Strength.

A character **Only** recovers Life Points during an Extended Rest.

When a character is **Reduced** to Zero Life Points they require medical attention to recover.

# Chapter 2: Character Races

In addition, when an attack would knock you **Prone**, you may immediately make a **Saving Throw** to avoid falling **Prone**.

**Cords of Muscle:** +5 Racial bonus to all rolls for lifting, sliding and pulling to appropriate **Strength** checks.

The original work horses of Equestria, Earth Ponies proudly make their way in life without the benefit of magic or flight. This doesn't leave them any less capable than the other races, however. Instead, it has let them develop a close connection with the land, along with the benefit of hardiness that comes from working the earth.

A proud and industrious race that is more than willing to trade their crops or crafts to the other races. It is said that where an Earth Pony strikes dirt, a town is sure to follow.

They can cause clouds to thunderstorm and even churn winds up into funnels. The DM sets the DCs and skills used when manipulating weather, but generally Athletics or Acrobatics are used for direct applications, while Knowledge checks are used for planning weather patterns.

Though other races may look at pegassi as aloof or too engaged in seeking thrills to be reliable, they have a tremendous track record on coming to the aid of the other races in times of need. Without any expectation of self-gain, a pegasus would gladly lay down their life to help their friends.

Being a creature of the sky leaves the pegassi in the unique position of influencing the weather. This is done through communicating with the clouds, or working in their massive factories dedicated to keeping Equestria's eco-system strong.

Play a pegasus if you want...

- To be fast, and unhindered by gravity

**Magic Kindergarten:** You can use your horn's power to move an object up to 10 pounds via Telekinesis, create illumination centered on your horn, and perform minor magical effects with your Cutie Mark focused skill, or Arcana.

Out of all the races that reside in Equestria, the unicorn is unique in their ability to manipulate the energy in their souls for casting spells. It is said the bigger the heart of the unicorn, the more powerful the magic they can bring to bear in the defense of their friends.

Unicorns are sometimes seen as haughty because of their powerful abilities, but this is hardly the truth. Their magic brings a certain amount of discipline to their life that is needed to be carefully watched over. It is rumored that in times of a unicorn without proper control of their emotions can affect reality around them without realizing it.

Foals hold an important place in pony society because so much relies upon them. There is a heavy emphasis put on letting them experience the world and all its wonders in pursuit of their cutie marks, and ultimately their purpose in life. To this end, it is not uncommon to come across adventurous colts and fillies more than willing to take on all challenges life can throw at them without batting an eye.

Play a foal if you want...

- To be the quickest in the party
- To be flexible in what you pursue
- To be just like your idol
- To be a young filly or colt that wants to strike out into the world today for the betterment of all pony kind, rather than tomorrow

It is said that the beautiful crystalline form of a pony represents the inner strength that they resonate in the world. This is seemingly true, as they are capable of being influenced by magic from the outside. Now with the return of their Princess, these creatures of the night have enjoyed a renaissance where their proficiency in warding off danger during the night has come to recognition. They are stronger than pegassi, though not as quick, and can go where no other creature can. **Rhythm and Stripes:** You get a +4 bonus to **AC** against **Opportunity Attacks**.

**Quick Hooves:** Once per round, when an **Attack Misses** you can **Shift 1** square.

**Vagabond Spirit:** You gain a +5 bonus to **Endurance Checks** to survive in harsh climates and weather. You also have a +5 to **Nature** and **Dungeoneering Checks** to scrounge up food, herbs and magical components

Hailing from jungle depths outside of Equestria, these striped cousins to the smaller equines emerge to offer their skills to a more civilized people. Their close dealings with spirits and creatures of the forest give them an almost encyclopedic knowledge on wildlife, herbal cures and strange potions.

Zebras are equines in a rare position of being seen as ponies by the rest of Equestria without being accepted by those that makeup the populace. They are generally seen in small numbers, and outside the restrictive confines of a city. Their penchant for rhyming is near legendary amongst pony aristocracy.

Play a zebra if you want...

- To be mysterious at first brush

- To be a zebra that brings an outsider's view of the world to a party in a refreshing manner

**Philiavore:** You do not regain life points when you take an extended rest, and you do not need to eat, drink or sleep. Once per day outside of combat you may feed off the strong positive emotions (Such as happiness, Friendship, Infatuation, or Love) another feels towards you or your current form, if you do you regain life points and dailies as if you had taken an extended rest (this is the only way you may recover life points.), the victim takes a -1 penalty to all attributes until they take an extended rest this does not affect their maximum life points.

Unlike the more prolific unicorns, that manifest their power through strength from within, the alien-like race of changelings prey on the emotions of other species for this purpose.

This is done all in the name of their Queen Chrysalis, whom they regard with a fervor even the most zealous of ponies find frightening. Perhaps it is also engrained in their very nature, for without powerful love to feed off of, they would just wither away.

Play a changeling if you want...

- To be the sly face of the group you've infiltrated
- To use clever words and tactics to stay hidden
- To help prepare the way for your Queen's coming.
- To be one of many changelings working in secret for the betterment of your kind.

One would think that griffons would find it difficult being in a pony dominated world, where they have little influence on the Equestrian society. But the reality is the exact opposite, for these predators love a challenge. In the eyes of a griffon, proving one's dominance is far more important than maintaining a governmental position.

These beautiful, deadly creatures strive to be the best at whatever they put their talons to. They have little use for magic. Instead of relying on little tricks, a griffon often says, it should come down to strength and endurance.

Play a griffon if you want...

- To be an intimidating protector of your friends
- To prove you are the best around, on earth or in the sky
- To be a predator amongst herbivores
- To be a griffon that uses every opportunity to better yourself for the benefit of all around who rely on you

**Claws and Flames:** You are always considered **armed**, Treat your **unarmed attacks** as **melee weapons** of your level, and you may spit emerald fireballs that are treated as **spell craft** weapons of your level.

Few dragons mingle with the softer ponies that live in far off lands. They are a territorial bunch dedicated to protecting their ancestral volcano homes second, and personal collections of gems first.

These lizards move in packs during their migration to the volcanos, but otherwise live in a solitary fashion.

They are willing to communicate with the other species of Equestria in return for payment in the form of precious gems they consume like tasty treats.

Play an earth dragon if you want...

- To let avarice guide your heart
- To show the world that dragons can get along with other species – potentially for a price.
- To be the ever-evolving force behind a group of adventurers determined to make a difference in the world.

# Minotaur

## Minotaur Traits

**Ability Scores:** +1 Strength, +1 Knowledge

**Size:** Medium

**Speed:** 5 Squares (Ground)

**Vision:** Low-Light

-

- To push your allies to greater heights
- To push through challenges and limits with a bull-headed attitude
- To know what makes your friends tick, and work with strengthening their will by a combination of example and words.

# Diamond Dog

## Diamond Dog Traits

**Ability Scores:** +1 Agility, +1 Knowledge

**Size:** Medium

**Speed:** 5 Squares (Ground), 4 Squares (Tunneling)

**Vision:** Low Light

-

**Bonus Skill Trainings:** Dungeoneering and Perception trained

**Sensitive Senses:** Because of your long treks underground and sharp senses, you ignore any attack or perception penalties due to impeded vision. Perception checks based on hearing or smell get a +5 bonus.

**Minecraft:** Your tunnel speed allows you to move through soft packed dirt as a move action, or hard rock at half it's value. You can choose to collapse the tunnel behind you allowing you to safely hide underground, or leave it so others can follow.

Diamond dogs are a world apart from the surface society above. Seldom seen and often dreaded, it is not much of a wonder that their very appearance strikes disbelief of their presence in the pony folks above.

As their society does not oft interact with dragons that naturally feed on gems, their obsession with the precious stones has grown exponentially, as their hoards only grow rather than diminish. Though sometimes the pursuit of more gems and the curious nature of the world above draws them out.

Play a diamond dog if you want...

- To mix greed with need
- To wrangle a group of allies into helping you for your own needs, and possibly theirs
- To be a mixture of an antagonizing force that is too valuable to extricate from by providing dearly needed strength when it counts

# Spirit of Kindness

*"Hush now...quiet now. It's time to lay your sleepy head."*

## Kindness Traits

**Role:** Striker/Leader, This class moves around the battlefield with blinding speed healing allies until it needs to begin bringing its enemies to its needs.

One arrow can save a thousand lives, at those moments you sacrifice your defensive abilities to become an offensive power house.

Attentive. Where other ponies dash headlong into action, gathering up valor and the wounds that come with them, you move out of sight, tending to hurt ponies or silencing those boastful enemies. Because nopony hurts your friends.

Whether studying up on anatomy along with learning new medical treatments, or concocting new strands of virulent poisons with horticulture, Kindness ponies are both saviors and dangerous protectors.

Kindness ponies are always on the lookout for those that are incapable of defending themselves or in need of a helping hoof, ready to step forward without a selfish thought. Animals of all kinds understand this, and afford these ponies the proper respect they deserve.

Quick. There is no denying it when a Pegasus with the Spirit of Loyalty zips by in an explosion of colors that sweep across the sky after this living paintbrush.

Whether pushing the boundaries on extreme speed, developing new aerial acrobatics, or seeking death-defying thrills, a Loyalty pony is sure to be an exciting spirit that is always there for their friends when they need them most.

When in combat, it is difficult to keep track of a Loyalty pony, as they burst about the battlefield, pummeling down foes that would hurt their friends. Their natural affinity with weather gives them a large advantage over traditional weaponry and renders most types of armors completely useless against them.

Imaginative. This is the first word that other ponies apply to a Spirit of Laughter in reference to their unique abilities. These ponies seem to be somewhere in between this world and another, serving as the bridging point between the two.

Whether exuberant souls at home in the kitchen, or out scouting exciting new venues and planning events for parties, these ponies bring welcome excitement to everywhere they travel.

When it comes to taking up arms, Laughter conjures up an entire vanguard of seemingly inanimate objects that strike out when nopony is looking. Hysteria and confusion quickly soar through the enemy's ranks when they realize swords and bows are no match for the boiling imagination of these energetic souls.

Boom. Dragons are legendary beasts feared across Equestria for a reason, and their disciples understand the fierce power they can conjure forth with a roar. Scales glint in Celestia's sunshine, as you sail above the lands that you could rule over if you desired.

Fiery reptiles and their pony associates are slow to anger creatures. But an explosion of fire fanned by flapping leathery wings or tossed on piles of burning oils let foes know they crossed the line and assure allies they are there to aid them. They are not the boastful leaders of a group, but rather the dangerous ace-in-the-hole ready to be played when necessary.

Ember spirit folk look for new ways to deploy their fiery powers. An old saying you adhere to is, 'some ponies just want to watch the world burn'.

Wounds that would fell a pony simply are ignored, for they are beneath your attention. A Contest griffon simply has too much pride on the line to fail at whatever they put their talons to.

Contest griffons are always on the watch for exciting new opportunities to prove they are indeed the fiercest predators around. Of course, it never hurts to travel with a cadre of comrades who can exult in your presence, right?

- All weapons have an **ability at-will** that can be activated before striking an enemy. These are proactive and have to be called out ahead of time – they do not stack with class powers!

# Chapter 7: Monster Manual

# Monster Qualities

Monsters in **Courage is Magic** have stats very similar to 4<sup>th</sup> edition, but possess wildly different math to account for the new level and health system. It's just as easy to craft new ones, but more interesting to fight and play with!

## There are differences in how monsters are run

- Monsters **Do Not Regenerate Stamina** like players in between rounds. This makes combat much faster and less frustrating.
- Instead of becoming Bloodied, all effects that trigger based on health for a Monster instead activate when a Monster **Runs Out** of Stamina Points
- Monsters do not give Experience points to players anymore. Rather, the amount of Experience they would be worth is used to determine the encounter balance. These are referred to as **Goblin Points**!

# Magnitude

## Monster Solos now possess Magnitude

- Magnitude is meant to dampen the powerful snowballing effects that players can bring to combat. This prevents them from easily shutting down what should be intimidating and story-defining encounters

### Magnitude:

- Being **Slowed** reduces Movement by **Half** rather than being Reduced to 2.
- Being **Immobilized** means they cannot Shift and their Movement is Reduced to 2.
- When **Dazed**, the Solo loses its Minor Action and can't take Immediate or Opportunity Actions. (Still grants Combat Advantage)
- When **Stunned**, the Solo can only make 1 action on its turn, and cannot take Immediate or Opportunity Actions. (Still grants Combat Advantage)
- **Attack Penalties** are halved, and the Attack Bonus from Combat Advantage is reduced by 2.

# Goblin Points

**Encounter Difficulty** is determined by how many Goblin Points that are going to be in the encounter. The chart above has the value of how many Goblin Points players are worth compared to monsters.

**There are four difference kind of Encounters.**

- **Standard Encounter Goblin Points** - (Player Value \* Players)
- **Easy Encounter Goblin Points** - (Player Value \* Players) \* .75
- **Challenging Encounter Goblin Points** - (Player Value \* Players) \* 1.25
- **Deadly Encounter Goblin Points** - (Player Value \* Players) \* 1.5

Level	Player	Standard	Minion	Elite	Solo
1	100	100	25	200	400
2	200	200	50	400	800
3	300	300	75	600	1,200
4	525	450	110	900	1,800
5	750	600	150	1,200	1,800
6	975	750	185	1,500	3,000
7	1,350	1,000	185	1,500	4,000
8	1,725	1,250	310	2,500	5,000
9	2,100	1,500	375	3,000	6,000
10	2,475	1,750	435	3,500	7,000

**For Example:** You have 4 players that are each level six. You want to throw a standard encounter at them that will test their abilities but not deal too much damage.

**Step 1:** You select the difficulty above. You have selected an Easy Encounter

**Step 2:** Determine how many Goblin Points the players are worth. For an Easy Encounter, the formula is (Player Value \* Players) \* .75 Players at level 6 are worth 975 Goblin points, so you'll calculate  $(975 * 6) * .75$  for 4387 points.

**Step 3:** Keep adding monsters until they are equal to about 4400 points. Mix and match types for the most fun!

# Monster on a Card

**Creating Monsters** on the fly can be somewhat difficult, especially when you're running a campaign that depends on the players being challenged fairly. Below is a card that can be used to quickly come up with the stats needed for encounters.

**This card is only a suggestion.** If combat is proving too difficult, feel free to change the numbers subtly behind the scenes. Or if they just beat up an entire gang without breaking a sweat, watch out! You can always throw a big-bad boss at them.

Type	Formula
AC	$14 + (\text{Level} * 2)$
Attack/Initiative	$6 + \text{Level} * 1.5$
Damage	$6 + \text{Level} * 4$
Skirmisher	Stamina/LP $16 + \text{Level} * 8$ , +2 Initiative
Controller	Stamina/LP $16 + \text{Level} * 8$
Soldier	Stamina/LP $16 + \text{Level} * 8$ , +2AC
Brute	Stamina/LP $20 + \text{Level} * 10$ , -4AC, +2 Attack, Damage: $10 + \text{Level} * 2.5$
Artillery	Stamina/LP: $12 + \text{Level} * 6$
Lurker	Stamina/LP: $12 + \text{Level} * 6$ , +4 Initiative
