To use this guide, end the YouTube URL with the desired hour, minute and second mark. Entering the video address in this form will bring you directly to the short you want to see (or subject your friends to for the umpteenth time already). The end tag for the URL is as follows:

t is time, m is minute and
?t=ms

So for example, entering youtube.com/watch?v=Z0LgI6nF0rM?t=3m14s would load the video at the 3 minute 14 second mark. You can also click on the Share tab and enter the time in the "Start at" box, which is easier and more likely to work.
